DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1, 3-4, 8, 11-13, 17-18, 23-25 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

2. Claims 3-4, 8, 17-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 is rejected because the claim is drawn to a cell electrode so only one electrode is present and no redox reaction would result therefore the phrase "wherein only protons act as a charge carrier in a redox reaction in both electrodes associated with charge and discharge" does not further define a cell electrode and therefore does not further limit claim 1 from which the claim depends from. The claim is not drawn to a battery or a cell where there would be two electrodes present.

Claim 4 is rejected because it is unclear if the benzimidazole and its derivatives is an additional compound or further defining imidazole cited in claim 1.

Claim 8 is rejected because it does not further limit claim 1. This claim should be cancelled because it is claiming the same limitation.

Claim Rejections - 35 USC § 102

3. Claims 1, 3-4, 8, 11-13, 17-18, 23-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Shinozaki et al. (JP 3-182051, abstract).

Shinozaki et al. teaches a battery comprising two electrodes of which at least one comprises polyaniline as the principal electrode active substance. Shinozaki et al. teaches that 2 g polyaniline ***[95 parts proton-conducting compound]*** and 0.1 g 2-mercaptobenzimidazole ***[(5 parts nitrogen-containing heterocyclic compound, specifically an imidazole)]******[Thus teaching 1-80 parts by weight of the nitrogen-containing heterocyclic compound to 100 parts by weight of the active material]*** was mixed for the active substance. The active substance was formed on a stainless steel expanded metal to prepare the electrode.

Allowable Subject Matter

4. Claims 2, 5, 10, 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

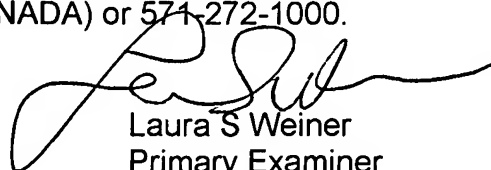

5. Claim 19 is allowed.
